Practical 15 (Web Designing - CM2104)

Name: Yash Pravin Pawar   Enrollment no.: 2106206   section: N1

Q. Applying CSS link properties: Create a web page with number of paragraphs and number of links. Apply different styles to hyperlinks:

- Link changing colors when visited.
- Link changing color on mouse hover.
- Link changing font-size on mouse over.
- Link changing background color on mouse-over.
- Link changing font-family when visited.
- Set color of some link to green.
- Remove underline from the links.
- Set the background color of link to TOMATO for visited and unvisited link.

Output:

Code:

```
<!DOCTYPE html>
<html>
    <head>
        <title>Practical 15</title>
```

```html
        <style>
            body { background: linen; }

            a { text-decoration: none; }

            .hover-link:hover {
                background: lightgreen;
                font-size: 2em;
                color: orange;
            }

            .visited-link:visited {
                color: orange;
                font-family: monospace;
            }

            .green:link { color: green; }

            .tomato:visited, .tomato:link { background: tomato; }
        </style>
    </head>
    <body>
        <h1>Links in HTML</h1>
        <p>A <a class="visited-link"
href="http://duckduckgo.com">link</a> changes color and font when
visited.</p>
        <p>This is a <a class="hover-link"
href="http://google.com">link</a> which changes color, font-size, and
background color on mouse over.</p>
        <p>A <a class="green"
href="http://en.wikipedia.org/wiki/Green">Green</a> link.</p>
        <p>A link which <a href="https://en.wikipedia.org/wiki/Tomato"
class="tomato">has background as tomato</a> for visited and unvisited
link.</p>
    </body>
</html>
```
