Practical 02 (Web Designing - CM2104)

Name: <u>Yash Pravin Pawar</u>   Enrollment no.: <u>2106206</u>   section: <u>N1</u>

Q. Design a web page with two paragraphs each of 8-10 lines. Assign a title to the webpage. Practice formatting tags for bold, italics, underline, centre, break, space, horizontal lines, span tag, pre tag etc.

Code:

```
<!DOCTYPE html>
<html>
<head>
    <title>Practical 02</title>
</head>
<body>
    <p><b>Web design</b> <em>encompasses</em> many different skills
    and disciplines in the production and maintenance of websites.
    The different areas of web design include web graphic design;
    user interface design (<i>UI design</i>); authoring, including
    standardised code and proprietary software; user experience
    design (<i>UX design</i>); and <abbr title="search engine
optimization">SEO</abbr>.</p>

    <p>Often many individuals will work in teams covering different
    aspects of the design process, although some designers will cover
    them all. The term <q>web design</q> is normally used to describe
    the design process relating to the front-end (<i>client side</i>)
    design of a website including writing markup. Web design
    partially overlaps web engineering in the broader scope of web
    development. Web designers are expected to have an awareness of
    usability and if their role involves creating markup then they
    are also expected to be up to date with web accessibility
    guidelines.</p>
    <hr>

style="color:limegreen;">Web Designing</span></small>
    </center>
```

```
    <pre>
        Using paragraph, bold, emphasis, italics, underline, small,
center, horizontal rule, span and break tags<br>
        And information from wikipedia page of Web design. <br>
        now we are inside the pre tag.
    </pre>
</body>
</html>
```
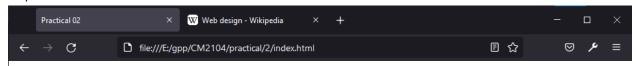

Output:

Web design *encompasses* many different skills and disciplines in the production and maintenance of websites. The different areas of web design include web graphic design; user interface design (*UI design*); authoring, including standardised code and proprietary software; user experience design (*UX design*); and SEO.

Often many individuals will work in teams covering different aspects of the design process, although some designers will cover them all. The term "web design" is normally used to describe the design process relating to the front-end (*client side*) design of a website including writing markup. Web design partially overlaps web engineering in the broader scope of web development. Web designers are expected to have an awareness of usability and if their role involves creating markup then they are also expected to be up to date with web accessibility guidelines.

Practical 02 of Web Designing

```
    Using paragraph, bold, emphasis, italics, underline, small, center, horizontal rule, span and break tags

    And information from wikipedia page of Web design.

    now we are inside the pre tag.
```
